IV. Assessment parameters and criteria

(A) Key parameters

The key parameters of a quality assessment report draw upon the basic quality requirements for acceptable evaluation reports.¹ Key parameters include:

- **Terms of Reference:** Do the terms of reference appropriately and clearly outline the purpose, objectives, criteria and key questions for the evaluation?
- **Evaluation subject, context and purpose:** Are the nature of the subject being evaluated, the context in which it takes place, the underlying assumptions and the reasons for evaluating it described with sufficient clarity?
- **Evaluation framework:** Are the evaluation's objectives, criteria and methodology fully described and appropriate given the subject being evaluated and the reasons for carrying out the evaluation?
- **Findings:** Were the analysis and findings appropriate and based on the evaluation criteria (e.g., relevance, effectiveness, efficiency, sustainability and impact), and did they directly respond to evaluation questions? Did analysis of the programme or project include how UNDP addressed programme principles and finance management (i.e. an assessment of funding and programme delivery, quality of monitoring and evaluation)?
- **Conclusions:** Do the conclusions go beyond findings and identify underlying priority issues? Do the conclusions present logical judgements based on findings that are substantiated by evidence? Do the conclusions include insights related to the subject and purpose of evaluation?
- **Recommendations and lessons:** Are the recommendations and lessons relevant to the subject and purposes of the evaluation, and are they supported by evaluation evidence?

(B) Rating

The following rating scale will be used to assess the key parameters listed above:

Code	Rubric for assigning rating	Value
HS	Highly Satisfactory: All parameters were fully met and there were no shortcomings in the evaluation report	6
S	Satisfactory: All parameters were fully met with minor shortcomings in the evaluation report	5
MS	Moderately Satisfactory: The parameters were partially met with some shortcomings in the evaluation report	4
MU	Moderately Unsatisfactory: More than one parameter was unmet with significant shortcomings in the evaluation report	3
U	Unsatisfactory: Most parameters were not met and there were major shortcomings in the evaluation report	2
HU	Highly Unsatisfactory: None of the parameters were met and there were severe shortcomings in the evaluation report	1

(C) Weightings

¹ As outlined in UNDP evaluation guidance. See UNDP, 'Handbook on Planning, Monitoring and Evaluating for Development Results' (2009), available at: www.undp.org/evaluation/handbook/

A quality assessment report's overall quality score is based on ratings of the key parameters of quality, weighted based on their importance. The Findings parameter is assigned 45 points (15 points for each of three subcriteria), the Conclusions 15 points and other parameters are assigned 10 points each.

	Key quality assessment criteria	Weightings	HS	S	MS	MU	U	HU
1	Clarity of terms of reference	10						
2	Clarity of purpose and subject of evaluation	10						
3	Clarity of evaluation design	10						
4	Quality of findings (i): Analysis presented is easily comprehensible and addresses evaluation objectives and questions	15						
	Quality of findings (ii): Adequate use of evaluation criteria	15						
	Quality of findings (iii): Adequate coverage of mainstreaming of UNDP programme principles	15						
5	Validity and reliability of conclusions	15						
6	Validity and actionability of recommendations and lessons	10						
Total Score		100						

(D) Criteria for rating

A quality assessment of an evaluation report's analysis is based on criteria that are used in all UNDP evaluations.²

- **Relevance:** Is there an assessment of the interventions' relevance that is based on analysis of national context, needs and priorities in the programme/thematic area?
- **Effectiveness:** Did the evaluation report analyse the extent to which the intended outputs were attained? Did the evaluation analyse UNDP interventions' contributions to the outcomes? Using evaluative evidence, to what extent did the report explain contributing factors? Were unintended outcomes (positive or negative, direct or indirect) analysed?
- **Efficiency:** Did the report analyse how well UNDP organized itself in delivering its work with regard to managerial and programme efficiency? Did the report assess outputs in relation to inputs, costs, implementation time-frame and timeliness? Did the evaluation sufficiently discuss issues related to comparative cost-effectiveness?
- **Sustainability:** Is there an assessment of the likelihood that outcomes and benefits generated through a set of interventions (programmes, projects and non-project activities) will continue to exist with a lower level of external support? Did the report provide analysis, based on

² See, 'Handbook on Planning, Monitoring and Evaluating for Development Results', Section 7.4. Available at <www.undp.org/evaluation/handbook/documents/english/pme-handbook.pdf>

evaluative evidence, of the extent to which the outcomes and outputs will be sustainable and the factors that contribute to this?

- **Impact:** Did an impact evaluation analyse actual or intended changes in human development as measured by people's well-being?
