## INTRODUCTION

1. The tables which follow include a summary of statistics on technical co-operation project activities of the organizational entities of the United Nations and detailed information on the United Nations Department of Technical Co-operation for Development (DTCD). The information was requested in Governing Council decision 79/22, and this report has been prepared in conjunction with two other reports before the thirty-fourth session of the Council, DP/1987/12/Add.3 and DP/1987/59, which contain basic programme data related to work financed by UNDP and information on agency regular budget and non-UNDP extrabudgetary technical co-operation activities. An analysis of the DTCD programme delivery and administrative costs is included in DP/1987/45.
2. Financial data in this document have been derived from the financial statements for the year ending 31 December 1986.
3. As a result of the new status of UNIDO as a specialized agency, the provision of financial data pertaining to its activities has been discontinued.

## PROGRAMME DELIVERY

4. In 1986, the organizational entities of the United Nations delivered a technical co-operation programme of \$232 million, compared with \$198 million in 1985 (excluding UNIDO). This represents a 17 per cent increase in project expenditures.
5. Of this amount, DTCD executed a programme of \$145.9 million. UNDP-financed projects represented \$103.1 million of this total; projects financed by the United Nations Fund for Population Activities (UNFPA) accounted for \$13.2 million; \$21.8 million went for Trust Fund-financed activities; and \$7.8 million was expended under the United Nations regular programme for technical co-operation. In comparison with 1985, budgets increased by \$10.6 million (6.4 per cent) in 1986 to \$175.9 million and the delivery of \$145.9 million was 14.7 per cent above the previous year's total of \$127.2 million. The implementation rate was 83 per cent.
6. On a geographic basis, the DTCD-executed programme in 1986 included expenditures of \$58.7 million in Africa; \$35.9 million in Asia and the Pacific; \$30.4 million in the Middle East, Mediterranean, Europe and Interregional (MEMEI); and \$20.9 million in the Americas. The largest growth was in Africa, where the programme increased by \$13.5 million. Project delivery in Africa remained the largest, and its share of the total delivery increased from 36 per cent to 40 per cent.
7. The distribution of project expenditures by substantive sectors was the following: natural resources and energy, \$74.3 million; development planning, \$26.3 million; statistics, \$15.5 million; public administration and finance, \$14.9 million; population, \$6.4 million; social development, \$4.3 million; United Nations Educational and Training Programme for Southern Africa (UNETPSA),

/...

\$3.1 million; and others, \$1.1 million. Natural resources and energy, which comprised 51 per cent of the DTCD total, remained the largest programme; development planning continued to be the second largest. The largest growth by sector was in natural resources and energy, which increased by \$14.6 million (25 per cent) over the previous year's expenditures.

8. On a component basis, department delivery in 1986 included \$65.3 million for project personnel, \$45.0 million for equipment, \$20.6 million for training, \$9.2 million for sub-contracted services and \$5.8 million for miscellaneous expenses. The component which showed the largest growth was equipment which rose by \$10.3 million. The proportion of total expenditures increased for equipment (up 3.6 per cent), sub-contracts and miscellaneous (both up 0.7 per cent); while that for personnel and training decreased 2.1 per cent and 2.9 per cent respectively.
