Thirty-eighth session
3 - 21 June 1991, New York
Item 6 of the provisional agenda
UNFPA

SUPPORT

UNITED NATIONS POPULATION FUND

STATUS OF FINANCIAL IMPLEMENTATION OF GOVERNING COUNCIL-APPROVED
UNFPA PROGRAMMES AND PROJECTS

Report of the Executive Director

SUMMARY

This report of the Executive Director on the status of financial implementation of Governing Council-approved UNFPA programmes and projects is prepared in response to decision 84/21/III, paragraph 2, which was approved by the Governing Council at its thirty-first session. It contains details on expenditures to these programmes and projects by year as well as by region and country, showing the amounts still to be allocated under Governing Council approvals. It also assesses the level of programme implementation by applying the concept of multi-year resource delivery rate as introduced in document DP/1989/34 submitted to the thirty-sixth session of the Council. This document is submitted to the Council for its information.

INTRODUCTION

1. At its thirtieth session (1983), the Governing Council, in decision 83/17 I, paragraph 19, requested the Executive Director to submit a report to the Council at its thirty-first session on Governing Council approvals by country, giving the period covered, total commitment, expenditures of past years and current allocations. In compliance with this request, the Executive Director provided the required information to the Council at its thirty-first session in a document entitled "Report of the Executive Director on the Status of Financial Implementation of Governing Council-Approved UNFPA Country Programmes and Projects" (DP/1984/32).

2. At its thirty-first session, the Council expressed its appreciation for the report provided by the Executive Director and requested, in decision 84/21 III, paragraph 2, that similar reports be provided in future years. The Executive Director herewith presents the seventh update of this information, which should be read in conjunction with the Work Plan for 1992-1995 and request for approval authority (DP/1991/30), also being submitted to the Governing Council at its thirty-eighth session. To give a more accurate picture of the progress of UNFPA activities, estimated expenditures for 1990 have been used rather than allocations for that year.

3. In view of the concern of the Council about the timeliness of allocations that are based upon Council approval, this report is structured according to the date of approval by the Council rather than according to geographical or other country groupings. Thus, information is provided on (a) those programmes and projects that were approved by the Council at its thirtieth and subsequent sessions (tables A.1 to A.6); and (b) those that are being submitted to the present session (table B). This report provides information on the "Resource delivery rate of programmes and projects approved in or after 1983 and completed in or before 1990" (table D) and on programmes completed during 1990 (table E by year of expenditures, table F by substantive area). The programme resource delivery rate, which was defined in document DP/1989/34, is expressed as the total expenditure for a programme, divided by the total amount approved by the Governing Council for that programme.

4. As noted above, the data for 1990 are based on projections of 1990 expenditures rather than on allocation data for that year. Projected expenditure rates used in this report are 80 per cent for country programmes and projects and 90 per cent for regional and interregional programmes.

5. Most of the tables also include either the resource delivery rate for each completed programme or project or the current expenditure rate for ongoing programmes. The current expenditure rate is the total expenditure accumulated up to (and including) 1990 divided by the amount approved. It applies to ongoing programmes only. When a programme completes its cycle, the current expenditure rate becomes the resource delivery rate.

6. In terms of the format of tables, it is important to note the following: the starting date of a programme is the one approved by the Governing Council; the end of a programme is either (a) the year when all projects were completed, or (b) the year when a subsequent programme began. For programmes starting in the middle of a year, the yearly expenditures have been prorated.

7. In compliance with the Governing Council request, and because the Fund had sought and obtained assistance from multi-bilateral sources to supplement its regular budget, the presentation of the data has been modified to reflect these additional contributions. In tables A.1 through A.6 and in tables B, D, E and F, the amounts approved by the Governing Council include the regular funds approved and other resources such as multi-bilateral assistance. The current expenditure rates and the resource delivery rates include all funds. The amounts of regular funds approved are also shown in most of these tables as well

as the balance of commitment from regular funds which also appear in table C. The balance of commitment refers to regular funds only. It should also be noted that the availability of resources other than regular funds is not always predictable. Other factors, such as the momentum in population programming, the readiness of governments to absorb population assistance or the need to keep programme operations synchronized with other agencies and government plans, all can affect the current expenditure and the delivery rates of programmes.

8. Tables A and A.1 to A.6 show the expenditures for country and intercountry programmes and projects approved by the Governing Council, year by year. Table B lists the submissions to the thirty-eighth session of the Council. Table C, based on regular funds only, shows the balance of UNFPA commitments. Table D, as noted above, lists the expenditures and shows all the programmes that started in 1983 or later and came to an end in or before 1990. Table D also shows the resource delivery rate of these programmes. Tables E and F show the resource delivery rates of programmes ending during 1990, by year and by substantive area, respectively.

I. COUNTRY PROGRAMMES AND PROJECTS APPROVED BY THE GOVERNING COUNCIL PRIOR TO ITS THIRTIETH SESSION

9. As explained in the Executive Director's final report on the review and reassessment of the total UNFPA programme for 1982-1985 (DP/1986/35), all country programmes and projects that had been approved by the Council at or before its twenty-eighth session of June 1981 had come to an end by December 1985. For many of the countries concerned, new programmes had been developed by UNFPA and approved by the Council since its thirtieth session in June 1983. These new programmes subsumed outstanding balances, if any, of the prior programmes. Thus, UNFPA no longer has outstanding commitments to any country programme activities or large-scale projects that had been approved by the Council at or before its twenty-eighth session.

10. At its twenty-ninth session, the Governing Council did not approve any new country programmes or large-scale projects (defined as those over \$1 million) of UNFPA.

II. COUNTRY AND INTERCOUNTRY PROGRAMMES AND PROJECTS APPROVED BY THE COUNCIL AT ITS THIRTIETH THROUGH THIRTY-SEVENTH SESSIONS

11. At its thirtieth session (1983), the Governing Council approved four country programmes and one large-scale project in sub-Saharan Africa totalling \$9.9 million. The Council also approved a new programme in Thailand amounting to \$5.9 million. The expenditures of these programmes and project are contained in table D. All the country programmes approved in 1983 were completed: the one for Zaire in 1985, those for Malawi, Niger and Thailand in 1986, the one for Benin in 1987 and the one for Zimbabwe in 1988. New programmes for these countries have been approved by the Council at subsequent sessions. The average resource delivery rate for these programmes was 70.3 per cent. The average resource delivery rate is the sum of multi-year expenditures divided by the total amount approved by the Governing Council. The lowest rate was 35.4 per cent and the highest was 97.6 per cent (table D).

12. At its thirty-first session (1984), the Governing Council approved six country programmes and one large-scale project in sub-Saharan Africa, Asia and the Pacific, and Latin America and the Caribbean amounting to \$75.8 million. All these programmes and project approved in 1984 were completed: those for Zambia, Viet Nam and Peru in 1987, those for the Central African Republic and Togo in 1988, those

for China and the Dominican Republic in 1989. New programmes for Zambia, Viet Nam, Peru, Central African Republic, Togo and China were approved at subsequent Governing Council sessions. A new programme for the Dominican Republic is being submitted for approval at the thirty-eighth session of the Governing Council. The delivery rate ranged from 77.3 to 111.3 per cent, giving an average of 106.8 per cent (table D).

13. At its thirty-second session (1985), the Governing Council approved eight country programmes and two large-scale projects in sub-Saharan Africa, Asia and the Pacific, and Latin America and the Caribbean amounting to \$136.2 million. The expenditures for these programmes and projects is shown in table A.1. The programme for Uganda was concluded in 1987 and a new programme for that country was approved in 1988 (table A.4). The project in Nicaragua ended in 1988 and a programme for that country was approved by the Governing Council in 1989 (table A.5). Multi-bilateral funds for the earlier project are included in the figures for that country, increasing the total of funds available by \$4.8 million (table A.1). Expenditures for multi-bilateral funds are reflected in the yearly breakdown. The programmes for Cote d'Ivoire and Cuba were concluded in 1989 and new programmes for these countries were approved by the Governing Council in 1990 (table A.6). It should be noted that the \$15.0 million approved for Brazil will be allocated over a seven-year period instead of a five-year period as originally scheduled. The programmes for Ghana and Indonesia ended in 1990 and new programmes for these countries were approved in 1990 by the Governing Council (table A.6). They will start in 1991. The programmes for Bangladesh and India ended in 1990 and new programmes for these countries are being submitted for approval by the Governing Council at its thirty-eighth session (table B). By the end of 1990, the current expenditure rate for programmes and projects approved in 1985 was 84.6 per cent. The lowest rate was 19.1 per cent, the highest 117.7 per cent. The balance of funds was \$21.0 million or 15.4 per cent of the total approved. The balance of commitment from regular funds was 24.9 million or 18.9 per cent of the total of regular funds approved.

14. At its thirty-third session in 1986 (table A.2), the Governing Council approved seven country programmes in sub-Saharan Africa, Arab States and Europe, and Asia and the Pacific. These seven country programmes had been submitted by UNFPA at two different funding levels (\$41.0 million and \$57.0 million) due to some uncertainty concerning the expected resources of the Fund. It was not known at the time whether the United States, traditionally UNFPA's largest donor, would contribute to UNFPA in 1986 and future years. However, owing to supplemental contributions (by Canada, Finland and the Netherlands) for 1986 and the depreciation of the U.S. dollar vis-à-vis other major currencies, the Fund's income in 1986 decreased by only 2.0 per cent. Thus, later in the year, the Fund found itself in a position to commit resources at the original higher level of funding. The programmes for the Democratic People's Republic of Korea and for the Syrian Arab Republic were completed in 1989, and new programmes for these two countries were approved by the Governing Council in 1990 (table A.6). All in all, by the end of 1990, the programmes approved in 1986 had reached an expenditure rate of 57.7 per cent, the lowest being 47.1 per cent and the highest 87.4 per cent. The balance of funds was \$24.1 million or 42.3 per cent of the total approved. The balance of commitment from regular funds was \$10.2 million or 24.9 per cent of the total of regular funds approved.

15. At its thirty-fourth session (1987), the Governing Council approved 31 country programmes in sub-Saharan Africa, Arab States and Europe, Asia and the Pacific, and Latin America and the Caribbean. The expenditures for these programmes are contained in table A.3. Like the previous year, because of uncertainty concerning the Fund's level of resources for 1987, country programmes were submitted at two funding levels -- \$107.8 million and \$151.0 million. As in 1986, the funding situation of UNFPA improved during the course of 1987 to the extent that the Executive Director was able to allocate funds in accordance with the higher level of resources. The figures, therefore, constitute a maximum commitment to the country programmes. After three years of implementation, the 31 programmes, which started in 1987, reached an

expenditure rate of 77.4 per cent, the lowest being 48.5 per cent and the highest 128.2 per cent. The balance of funds was \$34.2 million or 22.7 per cent of the total approved. The balance of commitment from regular funds was 8.0 million or 7.4 per cent of the total of regular funds approved. The programmes for Angola and Congo were completed in 1990. A new programme for Angola was approved in 1990 (table A.6) and a new programme for Congo is being submitted for approval by the Governing Council at its thirty-eighth session (table B).

16. At its thirty-fifth session (1988), the Governing Council approved 16 country programmes in sub-Saharan Africa, Arab States and Europe, Asia and the Pacific, and Latin America and the Caribbean totalling \$99.1 million. In addition, the Governing Council approved a comprehensive UNFPA intercountry programme (four regional programmes plus one interregional programme) for the period 1988-1991 in the amount of \$185.2 million. The expenditures for these programmes (including those for projects separately approved by the Governing Council, such as Global Programme of Training in Population and Development) are contained in table A.4. The programme for Cape Verde was completed in 1990. A new programme for that country is being submitted for approval by the Governing Council at its thirty-eighth session (table B). For the regional and interregional programmes alone, the balance was \$41.1 million, or 22.2 per cent of the amount approved for intercountry activities. For the programmes listed in the table, an average of 71.5 per cent of the resources approved by the Governing Council had been spent by the end of their third year of implementation. The lowest rate of expenditure was 15.1 per cent, while the highest was 128.1 per cent. The balance of funds was \$81.0 million or 28.5 per cent of the total approved. The balance of unspent regular funds was \$78.4 million or 29.2 per cent of the total of regular funds approved.

17. At its thirty-sixth session (1989), the Governing Council approved 13 country programmes in sub-Saharan Africa, Arab States and Europe, Asia and the Pacific, and Latin America and the Caribbean totalling \$146.1 million. The expenditures for these programmes are contained in table A.5. At the end of 1990, an average of 16.1 per cent of the resources approved by the Governing Council had been spent. The lowest rate of expenditure was 8.1 per cent, while the highest was 37.1 per cent. The balance of funds was \$122.6 million or 83.9 per cent of the total approved. The balance of regular funds was \$103.5 million or 82.5 per cent of the total of regular funds approved.

18. At its thirty-seventh session (1990), the Governing Council approved 13 country programmes in sub-Saharan Africa, Arab States and Europe, Asia and the Pacific, and Latin America and the Caribbean totalling \$110.0 million. The expenditures for these programmes are contained in table A.6. An average of 7.2 per cent of the resources approved by the Governing Council had been spent by the end of their first year of implementation. The lowest and highest rates of expenditure were 5.4 and 19.4 per cent respectively. The balance of funds was \$102.1 million or 92.8 per cent of the total approved. The balance of regular funds was \$91.3 million or 92.4 per cent of the total of regular funds approved.

III. SUBMISSIONS OF PROPOSED COUNTRY AND INTERCOUNTRY PROGRAMMES TO THE COUNCIL AT ITS THIRTY-EIGHTH SESSION

19. UNFPA is submitting 15 proposed country programmes and one intercountry programme for approval by the Council at its thirty-eighth session, all of which have an intended duration of four or five years. They are presented in table B. The total amount for these 15 countries is \$219.7 million, (i.e., \$159.7 million of regular funds and \$60.0 million of other resources). The amount submitted for the intercountry programme is \$178.0 million, (\$111.6 million for the interregional programme and \$66.4 million for the regional programmes).

20. The total balance of financial commitment of UNFPA (using regular funds only) to Council-approved country and intercountry programmes and large-scale projects, including the submissions to the thirty-eighth session of the Governing Council, will amount to \$630.3 million. It is presented in table C, broken down by geographical area. Table C also shows that the balance of commitment to country activities is \$406.0 million. It should be noted that the balance of approved amounts (column 1 of table C) and the balance of funds remaining at the end of completed programmes (column 2 of same table) represent the balance of commitment for those programmes and that in the case of negative balances, UNFPA's commitment is considered to be zero.

IV. RESOURCE DELIVERY RATES OF PROGRAMMES AND PROJECTS APPROVED IN OR AFTER 1983 AND COMPLETED IN OR BEFORE 1990

21. Table D provides a compilation of all UNFPA programmes and projects that were approved by the Governing Council since 1983 and which were completed by 1990. It shows the expenditure in each country and the resource delivery rate over the programme period. It shows the delivery rates for 1983-1990 as 90.6 per cent (average). Final resource delivery rates may change slightly since expenditures for 1990 are estimated.

V. RESOURCE DELIVERY RATES OF PROGRAMMES COMPLETED DURING 1990

22. For the programmes ending in 1990 (table E), the average delivery rate was 85.8 per cent, which represents a total expenditure of \$96.2 million. As can be seen, among the seven programmes, the rates range from a low of 62.3 per cent to a high of 128.1 per cent.

VI. RESOURCE DELIVERY RATES OF PROGRAMMES COMPLETED DURING 1990, BY SUBSTANTIVE AREA

23. Table F shows the same programme expenditures as in table E, i.e., programmes that were completed during 1990, broken down by substantive area. It shows that the overall average delivery rate for those programmes was 85.8 per cent. Family planning (FP) programmes represent 93.6 per cent of the amount approved for that category. The activities in the field of information, education and communication (IEC) account for 69.5 per cent. The data collection and analysis category, and the one for population policy formulation have reached a rate of 165.6 and 103.9 per cent, respectively. This is presented graphically in figure 1.

Table A. Expenditures in programmes and projects approved by the Council from 1983 to 1990

											(US\$ thousands)		
Year of Council approval	Amount approved by Council	Expenditure 1983	Expenditure 1984	Expenditure 1985	Expenditure 1986	Expenditure 1987	Expenditure 1988	Expenditure 1989	Expenditure 1990 x)	Total 1983-1990	*	REGULAR FUNDS

Total	976,360	1,843	5,974	26,683	39,507	60,680	123,713	152,690	177,377	588,467	*	864,610	565,782

Notes:

'All Funds' means that expenditures for these programmes include multi-bilateral funds or resources other than regular funds.

The total of Regular Funds is the total of expenditures for each country; in some cases the expenditures have exceeded the approved amounts and in other cases, as the other resources were not made available, additional regular funds were used (in accordance with the stipulation approved by the Governing Council that UNFPA could provide for the shortcomings from its regular budget).

x) Estimated 1990 expenditure.

Notes:

(P) Priority country designated in accordance with Governing Council decision 82/20.

p) Represents project approval.

a) The programmes for Cote d'Ivoire and Cuba were completed in 1989. New programmes for these countries, which started in 1990, are shown in table A.6.

b) The programmes for Ghana and Indonesia were completed in 1990. New programmes for these countries, approved in 1990, are shown in table A.6.

The programmes for Bangladesh and India were also completed in 1990. New programmes for these countries, submitted for approval in 1991, are shown in table B.

c) The programme for Uganda was completed in 1987. A new programme, which started in 1988, is shown in table A.4.

d) The project for Nicaragua was completed in 1988. A new programme, which started in 1989, is shown in table A.5.

Regular funds for the Nicaragua project that ended in 1988 amounted to \$1.2 million, multi-bilateral funds to \$4.8 million.

l) The duration of this programme has been lengthened.

x) Estimated 1990 expenditure.

* Expenditures for these countries include multi-bilateral funds or resources other than regular funds.

Notes:

(P) Priority country designated in accordance with Governing Council decision 82/20.

p) Represents project approval.

a) Out of 6 programmes approved in 1983, 6 were completed.

b) Out of 7 programmes approved in 1984, 7 were completed.

c) Out of 10 programmes approved in 1985, 8 were completed.

d) Out of 7 programmes approved in 1986, 2 were completed.

e) Out of 31 programmes approved in 1987, 2 were completed.

f) Out of 21 programmes approved in 1988, 1 was completed.

* Expenditures for these countries include multi-bilateral funds or resources other than regular funds.

x) Estimated 1990 expenditure.
